

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Previously Presented) A method for selecting a media type format for which to generate value-bearing item indicia, said method comprising:
receiving from a user an input of a secured paper control number, wherein said secured paper control number comprises a serial number that uniquely corresponds to a particular unit of secured paper stock; and
identifying a media type format corresponding to the secured paper control number.
2. (Original) The method of Claim 1 for selecting a media type format, said method further comprising:
generating a label stock preview display in a format according to the media type format.
3. (Original) The method of Claim 1 for selecting a media type format, said method further comprising:
generating value-bearing item indicia in a format according to the media type format.
4. (Previously Presented) A method for determining a media type for a particular unit of secured paper, said method comprising:
receiving from a user an input of a serial number, wherein the serial number is displayed on the particular unit of secured paper and wherein the serial number uniquely identifies the particular unit of secured paper; and

retrieving from a memory storage a record corresponding to the serial number, wherein said record defines a media type format corresponding to the serial number.

5. (Original) The method of Claim 4 for determining a media type for a particular unit of secured paper, said method further comprising:

generating a label stock preview display in a format according to the media type format.

6. (Previously Presented) The method of Claim 4 for determining a media type for a particular unit of secured paper, wherein the serial number comprises a media type identifier.

7. (Original) The method of Claim 4 for determining a media type for a particular unit of secured paper, said method further comprising:

formatting a set of value-bearing item indicia according to the media type format.

8. (Previously Presented) A method for identifying to a system a secured paper media type, said method comprising:

displaying on a particular unit of secured paper a unique secured paper identifier wherein the particular unit of secured paper corresponds to a particular media type, said media type characterized by a set of media type information; and

recording on a database a relationship between the unique secured paper identifier and the corresponding media type information.

9. (Previously Presented) The method of Claim 8 for identifying to a system a secured paper media type, wherein each unit of secured paper bears a distinct, unique secured paper control number.

10. (Previously Presented) The method of Claim 8 for identifying to a system a secured paper media type, wherein each unit of secured paper is associated with a distinct, unique secured paper control number.
